Dear Employer:

This letter is to express my interest in your posting on your website for an experienced, detailed-oriented, passionate front end web developer. With 6 years of hands-on experience efficiently coding websites and applications using modern HTML5, CSS3, and JavaScript, I am passionate about modern technologies such as NodeJS, React, ASP.NET Core and D3JS.

I see myself in the next 3 to 5 years building state-of-the-art, easy to use, IoT applications. I actively seek out new technologies and stay up-to-date on industry trends and advancements within User Experience and Software. I utilize articles, twitter streams, and podcasts by using the PLE system [Personal Learning Environment].

I am currently studying ElectronJS, ReactJS, React Native and NodeJS (ExpressJS), SVG (D3JS) to build my own APIs for Admin Dashboards. I do believe that the next few years will explore Cloud platforms in detail. I currently have two applications on Microsoft Azure utilizing NodeJS, MongoDB, IoT Hub, and Cognitive Services API.

I have quite a bit of experience in MVC mainly with ASP.NET incorporating views with Bootstrap. Now that we have dynamic JavaScript Frameworks, I am incorporating online education to understand ES6 to build Single Page Applications. This is why I have invested in UDEMY courses so that I can stay on top of software innovations and cutting edge frameworks.

I've attached a copy of my resume that details my experience, along with links to the various websites and applications I've had the honor of working on. But the work that I have done doesn't cover my passion and continued commitment to delivering the best solutions possible.

I can be reached anytime via my cell phone, 469-952-9773 or via email at jay@blujconcepts.net. Thank you for your time and consideration. I look forward to speaking with you about this opportunity in person.

Best Regards,

Jarriel Henderson
