Profile

UX Developer | “Passionate for Code + Design”

Focused on innovative and interactive projects using Front End technologies, Media, and adopting the D6 Methodology and P. L. E. learning strategy.

Experience

Fossil Inc (Content Authoring - Contract – June 2015 - January 2016)

I worked on the Content Authoring Team managing the Adobe Experience Management (AEM) CMS platform. I updated content through 6 countries and maintained image assets, translations and worked with the design team to meet set timelines.

Chideo (Front End Developer (October 2014 - May 2015)

My main responsibility at Chideo was focused on the web application’s user interface using Foundation. This involved working closely with the designer and engineers to complete web templates. I in used semantic mark-up language i.e. HTML5/CSS3, to turn their static Photoshop designs into working browser based web pages.

Switch Commerce – (Front End Developer (November 2013 - June 2014)

I worked with the Business Analyst / Graphic Designer to implement the Front End needs for the company. We used the responsive framework Bootstrap v 3.0, using Flat UI and using ASP.NET MVC Razor. I was in charge of the views and creating layouts for partial views and shared. I also help our Q/A with functionality issues and create bugs.

Nerium International - (Front End Developer (November 2012 - September 2013)

- Create and maintain large scale .NET websites, microsites and landing pages for diverse cross section of clients
- Integrate designs and .NET back end functionality to create cutting edge web experiences
- Collaborate with designers, software engineers and information architects to design new websites
- Ensure authored code is cross-browser/platform/OS compatible

Education

University of Louisiana -Lafayette – Architecture/Civil Engineering N/A
